

MASTERSOLUTION SUITE

Classroom management

Cross-platform, educational interfaces for modern training and IT environments

MASTERSOLUTION SUITE classroom management unites a variety of educationally valuable functions and enables high-quality education and training. To ensure the full attention and integration of students, screens can be viewed in real time and all imaginable programmes and files can be transferred, shared or locked. With the MASTERSOLUTION SUITE Admin Console module, computers in the same network are centrally managed and maintained.

The MASTERSOLUTION SUITE XL version offers mobile components which can be downloaded free of charge in the relevant app stores. The Mobile Control App enables the management and monitoring of this classroom management solution via mobile devices (tablet, smart phone). Students or participants who have tablet PCs (iOS, Android) can be easily integrated into a lesson.

Features:

MASTERSOLUTION SUITE offers cross-platform classroom management with many educational functions for Windows, MAC and LINUX.
